

### DOVER

#### 625-line uhf colour television services

Channels: BBC-1 50, BBC-2 56, IBA 66, fourth programme 53  
 Maximum effective radiated power (vision): 100 kW  
 Polarization: horizontal  
 Receiving aerial group: C/D  
 Mean height of transmitting aerial: 776 feet (236.5m) agl, 1226 feet (373.7m) aod  
 Transmitter site: 3 miles west south-west of Dover  
 National Grid Reference: TR 274396

The service area is indicated by the unshaded part of the map, but the boundary should not be interpreted as a rigid limit. For all services transmitted, the areas covered are very similar but there are bound to be slight variations because of the different channels used. As the quality of reception on uhf can be very different at places only short distances apart, there are, inevitably, small pockets of poor reception which cannot be shown.
